

## Safety Data Sheet

---

### SECTION 1. IDENTIFICATION OF THE SUBSTANCE/MIXTURE AND OF THE COMPANY/UNDERTAKING

#### 1.1 Product Identifier

**Material Name** : Helix Ultra AG 5W-30  
**Product Code** : 001D7542

#### 1.2 Relevant identified uses of the substance or mixture and uses advised against

**Product Use** : Engine oil.

**Uses Advised Against** : This product must not be used in applications other than those recommended in Section 1, without first seeking the advice of the supplier.

#### 1.3 Details of the Supplier of the safety data sheet

**Manufacturer/Supplier** : Shell UK Oil Products Limited  
Shell Centre  
London  
SE1 7NA  
United Kingdom

**Telephone** : (+44) 08708500939

**Email Contact for Safety Data Sheet** : If you have any enquiries about the content of this SDS please email lubricantSDS@shell.com

#### 1.4 Emergency Telephone Number

: +44-(0) 151-350-4595

---

### SECTION 2. HAZARDS IDENTIFICATION

#### 2.1 Classification of the substance or mixture

1999/45/EC	
Hazard Characteristics	R-phrases(s)
Not classified as dangerous under EC criteria.;	

#### 2.2 Label Elements

**Safety Data Sheet****Labeling according to Directive 1999/45/EC**

EC Symbols : No Hazard Symbol required

EC Classification : Not classified as dangerous under EC criteria.

EC Risk Phrases : Not classified.

EC Safety Phrases : Not classified.

**2.3 Other Hazards**

**Health Hazards** : Not expected to be a health hazard when used under normal conditions. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis. Used oil may contain harmful impurities.

**Safety Hazards** : Not classified as flammable but will burn.

**Environmental Hazards** : Not classified as dangerous for the environment.

**SECTION 3. COMPOSITION/INFORMATION ON INGREDIENTS****3.1 Substance**

**Material Name** : Not applicable.

**3.2 Mixtures**

**Mixture Description** : Synthetic base oil and additives. Highly refined mineral oil.

**Hazardous Components****Classification of components according to Regulation (EC) No 1272/2008**

Chemical Name	CAS No.	EC Number	REACH Registration No.	Conc.
Calcium salicylate	83846-43-9	281-018-8	Not available / Not applicable.	1.00 - 3.00%
Zinc alkyl dithiophosphate	68649-42-3	272-028-3	Not available / Not applicable.	1.00 - 2.00%
Interchangeable low viscosity base oil	*	*	*	0.00 - 90.00%

## Safety Data Sheet

(<20,5 cSt @40°C) *				
---------------------	--	--	--	--

Chemical Name	Hazard Class & Category	Hazard Statement
Calcium salicylate	Aquatic Chronic, 3;	H412;
Zinc alkyl dithiophosphate	Skin Corr., 2; Eye Dam., 1; Aquatic Chronic, 2;	H315; H318; H411;
Interchangeable low viscosity base oil (<20,5 cSt @40°C) *	Asp. Tox., 1;	H304;

## Classification of components according to 67/548/EEC

Chemical Name	CAS No.	EC Number	REACH Registration No.	Symbol(s)	R-phrase(s)	Conc.
Calcium salicylate	83846-43-9	281-018-8	Not available / Not applicable.		R52/53	1.00 - 3.00%
Zinc alkyl dithiophosphate	68649-42-3	272-028-3	Not available / Not applicable.	Xi, N	R38; R41; R51/53	1.00 - 2.00%

**Additional Information** : The highly refined mineral oil contains <3% (w/w) DMSO-extract, according to IP346. The highly refined mineral oil is only present as additive diluent.

Refer to Ch 16 for full text of R- and H- phrases.

\* contains one or more of the following CAS-numbers (REACH registration numbers): 64742-53-6 (01-2119480375-34), 64742-54-7 (01-2119484627-25), 64742-55-8 (01-2119487077-29), 64742-56-9 (01-2119480132-48), 64742-65-0 (01-2119471299-27), 68037-01-4 (01-2119486452-34), 72623-86-0 (01-2119474878-16), 72623-87-1 (01-2119474889-13), 8042-47-5 (01-2119487078-27), 848301-69-9 (01-0000020164-80).

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

## SECTION 4. FIRST AID MEASURES

## 4.1 Description of First Aid Measures

**General Information** : Not expected to be a health hazard when used under normal

## Safety Data Sheet

	conditions.
<b>Inhalation</b>	: No treatment necessary under normal conditions of use. If symptoms persist, obtain medical advice.
<b>Skin Contact</b>	: Remove contaminated clothing. Flush exposed area with water and follow by washing with soap if available. If persistent irritation occurs, obtain medical attention.
<b>Eye Contact</b>	: Flush eye with copious quantities of water. If persistent irritation occurs, obtain medical attention.
<b>Ingestion</b>	: In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.
<b>Self-protection of the first aider</b>	: When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.
<b>4.2 Most important symptoms and effects, both acute and delayed</b>	: Oil acne/folliculitis signs and symptoms may include formation of black pustules and spots on the skin of exposed areas.
<b>4.3 Indication of any immediate medical attention and special treatment needed</b>	: Ingestion may result in nausea, vomiting and/or diarrhoea. Notes to doctor/physician: Treat symptomatically.

---

### SECTION 5. FIRE FIGHTING MEASURES

Clear fire area of all non-emergency personnel.

<b>5.1 Extinguishing Media</b>	: Foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.
<b>Unsuitable Extinguishing Media</b>	: Do not use water in a jet.
<b>5.2 Special hazards arising from the substance or mixture</b>	: Hazardous combustion products may include: A complex mixture of airborne solid and liquid particulates and gases (smoke). Carbon monoxide. Unidentified organic and inorganic compounds.
<b>5.3 Advice for firefighters</b>	: Proper protective equipment including chemical resistant gloves are to be worn; chemical resistant suit is indicated if large contact with spilled product is expected. Self-Contained Breathing Apparatus must be worn when approaching a fire in a confined space. Select fire fighter's clothing approved to relevant Standards (e.g. Europe: EN469).

---

### SECTION 6. ACCIDENTAL RELEASE MEASURES

Avoid contact with spilled or released material. For guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. Observe the relevant local and

## Safety Data Sheet

international regulations.

- 6.1 Personal Precautions, Protective Equipment and Emergency Procedures** :
- 6.1.1 For non emergency personnel: Avoid contact with skin and eyes.
  - 6.1.2 For emergency responders: Avoid contact with skin and eyes.
- 6.2 Environmental Precautions** :
- Use appropriate containment to avoid environmental contamination. Prevent from spreading or entering drains, ditches or rivers by using sand, earth, or other appropriate barriers.
- 6.3 Methods and Material for Containment and Cleaning Up** :
- Slippery when spilt. Avoid accidents, clean up immediately. Prevent from spreading by making a barrier with sand, earth or other containment material. Reclaim liquid directly or in an absorbent. Soak up residue with an absorbent such as clay, sand or other suitable material and dispose of properly.
- Additional Advice** :
- Local authorities should be advised if significant spillages cannot be contained.
- 6.4 Reference to other sections** :
- For guidance on selection of personal protective equipment see Chapter 8 of this Material Safety Data Sheet. For guidance on disposal of spilled material see Chapter 13 of this Material Safety Data Sheet.

---

## SECTION 7. HANDLING AND STORAGE

- General Precautions** :
- Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols. Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material.
- 7.1 Precautions for Safe Handling** :
- Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used. Properly dispose of any contaminated rags or cleaning materials in order to prevent fires. Keep container tightly closed and in a cool, well-ventilated place. Use properly labelled and closeable containers.
- Product Transfer** :
- This material has the potential to be a static accumulator. Proper grounding and bonding procedures should be used during all bulk transfer operations.
- 7.2 Conditions for safe storage, including any incompatibilities** :
- Store at ambient temperature.

Refer to section 15 for any additional specific legislation

**Safety Data Sheet**

covering the packaging and storage of this product.  
The storage of this product may be subject to the Control of Pollution (Oil Storage) (England) Regulations. Further guidance may be obtained from the local environmental agency office.

**Recommended Materials** : For containers or container linings, use mild steel or high density polyethylene.

**Unsuitable Materials** : PVC.

**7.3 Specific end use(s)** : Not applicable

**Additional Information** : Polyethylene containers should not be exposed to high temperatures because of possible risk of distortion. Exposure to this product should be reduced as low as reasonably practicable. Reference should be made to the Health and Safety Executive's publication "COSHH Essentials".

**SECTION 8. EXPOSURE CONTROLS/PERSONAL PROTECTION**

If the American Conference of Governmental Industrial Hygienists (ACGIH) value is provided on this document, it is provided for information only.

**8.1 Control Parameters****Occupational Exposure Limits**

Material	Source	Type	ppm	mg/m3	Notation
Oil mist, mineral	ACGIH	TWA(Inhalable fraction.)		5 mg/m3	

**Biological Exposure Index (BEI)**

Data not available

**PNEC related information** : Data not available

**Monitoring Methods** : Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate. Validated exposure measurement methods should be applied by a competent person and samples analysed by an accredited laboratory. Examples of sources of

## Safety Data Sheet

recommended exposure measurement methods are given below or contact the supplier. Further national methods may be available.

National Institute of Occupational Safety and Health (NIOSH), USA: Manual of Analytical Methods <http://www.cdc.gov/niosh/>

Occupational Safety and Health Administration (OSHA), USA: Sampling and Analytical Methods <http://www.osha.gov/>

Health and Safety Executive (HSE), UK: Methods for the Determination of Hazardous Substances <http://www.hse.gov.uk/>

Institut für Arbeitsschutz Deutschen Gesetzlichen Unfallversicherung (IFA), Germany. <http://www.dguv.de/inhalt/index.jsp>

L'Institut National de Recherche et de Sécurité, (INRS), France <http://www.inrs.fr/accueil>

### 8.2 Exposure Controls General Information

: The level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include: Adequate ventilation to control airborne concentrations. Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

Define procedures for safe handling and maintenance of controls. Educate and train workers in the hazards and control measures relevant to normal activities associated with this product. Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation. Drain down system prior to equipment break-in or maintenance. Retain drain downs in sealed storage pending disposal or for subsequent recycle. Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove

## Safety Data Sheet

contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

### Occupational Exposure Controls

- Personal Protective Equipment** : The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards. Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.
- Eye Protection** : Wear safety glasses or full face shield if splashes are likely to occur. Approved to EU Standard EN166.
- Hand Protection** : Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection: PVC, neoprene or nitrile rubber gloves. Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended. For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same, but recognise that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time may be acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material.
- Body protection** : Skin protection not ordinarily required beyond standard issue work clothes.
- Respiratory Protection** : No respiratory protection is ordinarily required under normal conditions of use. In accordance with good industrial hygiene practices, precautions should be taken to avoid breathing of material. If engineering controls do not maintain airborne concentrations to a level which is adequate to protect worker health, select respiratory protection equipment suitable for the specific conditions of use and meeting relevant legislation. Check with respiratory protective equipment suppliers. Where

**Safety Data Sheet**

air-filtering respirators are suitable, select an appropriate combination of mask and filter. Select a filter suitable for combined particulate/organic gases and vapours [boiling point >65 °C (149 °F)] meeting EN14387.

**Thermal Hazards** : Not applicable.

**Environmental Exposure Controls**

**Environmental exposure control measures** : Minimise release to the environment. An environmental assessment must be made to ensure compliance with local environmental legislation. Information on accidental release measures are to be found in section 6.

**SECTION 9. PHYSICAL AND CHEMICAL PROPERTIES****9.1 Information on basic physical and chemical properties**

Appearance : Amber. Liquid at room temperature.  
 Odour : Slight hydrocarbon.  
 Odour threshold : Data not available  
 pH : Not applicable.  
 Initial Boiling Point and Boiling Range : > 280 °C / 536 °F estimated value(s)  
 Pour point : Typical -36 °C / -33 °F  
 Flash point : Typical 230 °C / 446 °F (COC)  
 Upper / lower Flammability or Explosion limits : Typical 1 - 10 %(V)  
 Auto-ignition temperature : > 320 °C / 608 °F  
 Vapour pressure : < 0.5 Pa at 20 °C / 68 °F (estimated value(s))  
 Relative Density : Typical 0.854 at 15 °C / 59 °F  
 Density : Typical 854.4 kg/m<sup>3</sup> at 15 °C / 59 °F  
 Water solubility : Negligible.  
 Solubility in other solvents : Data not available

n-octanol/water partition coefficient (log Pow) : > 6 (based on information on similar products)  
 Dynamic viscosity : Data not available  
 Kinematic viscosity : Typical 69.5 mm<sup>2</sup>/s at 400 °C / 752 °F  
 Vapour density (air=1) : > 1 (estimated value(s))  
 Evaporation rate (nBuAc=1) : Data not available  
 Decomposition : Data not available  
 Temperature :  
 Flammability : Data not available  
 Oxidizing Properties : Data not available

## Safety Data Sheet

Explosive Properties : Not classified

### 9.2 Other Information

Electrical conductivity : This material is not expected to be a static accumulator.

Other Information : not a VOC

Volatile organic compound : 0 %

---

## SECTION 10. STABILITY AND REACTIVITY

- 10.1 Reactivity** : The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.
- 10.2 Chemical stability** : No hazardous reaction is expected when handled and stored according to provisions.
- 10.3 Possibility of Hazardous Reactions** :  
: Reacts with strong oxidising agents.
- 10.4 Conditions to Avoid** : Extremes of temperature and direct sunlight.
- 10.5 Incompatible Materials** : Strong oxidising agents.
- 10.6 Hazardous Decomposition Products** : Hazardous decomposition products are not expected to form during normal storage.

---

## SECTION 11. TOXICOLOGICAL INFORMATION

### 11.1 Information on Toxicological effects

- Basis for Assessment** : Information given is based on data on the components and the toxicology of similar products.  
Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).
- Likely Routes of Exposure** : Skin and eye contact are the primary routes of exposure although exposure may occur following accidental ingestion.
- Acute Oral Toxicity** : Expected to be of low toxicity: LD50 > 5000 mg/kg , Rat
- Acute Dermal Toxicity** : Expected to be of low toxicity: LD50 > 5000 mg/kg , Rabbit
- Acute Inhalation Toxicity** : Not considered to be an inhalation hazard under normal conditions of use.
- Skin corrosion/irritation** : Expected to be slightly irritating. Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.
- Serious eye damage/irritation** : Expected to be slightly irritating.

## Safety Data Sheet

- Respiratory Irritation** : Inhalation of vapours or mists may cause irritation.  
**Respiratory or skin sensitisation** : For respiratory and skin sensitisation: Not expected to be a sensitiser.  
**Aspiration Hazard** : Not considered an aspiration hazard.
- Germ cell mutagenicity** : Not considered a mutagenic hazard.  
**Carcinogenicity** : Not expected to be carcinogenic.

Material	Carcinogenicity Classification
Highly refined mineral oil (IP346 <3%)	ACGIH Group A4: Not classifiable as a human carcinogen.
Highly refined mineral oil (IP346 <3%)	IARC 3: Not classifiable as to carcinogenicity to humans.
Highly refined mineral oil (IP346 <3%)	GHS / CLP: No carcinogenicity classification

- Reproductive and Developmental Toxicity** : Not expected to be a hazard.

**Summary on evaluation of the CMR properties**

- Carcinogenicity** : This product does not meet the criteria for classification in categories 1A/1B.,  
**Mutagenicity** : This product does not meet the criteria for classification in categories 1A/1B.  
**Reproductive Toxicity (fertility)** : This product does not meet the criteria for classification in categories 1A/1B.

- Specific target organ toxicity - single exposure** : Not expected to be a hazard.

- Specific target organ toxicity - repeated exposure** : Not expected to be a hazard.

- Additional Information** : Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal. ALL used oil should be handled with caution and skin contact avoided as far as possible. Continuous contact with used engine oils has caused skin cancer in animal tests. Classifications by other authorities under varying regulatory frameworks may exist.

## Safety Data Sheet

---

### SECTION 12. ECOLOGICAL INFORMATION

- Basis for Assessment** : Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products. Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).
- 12.1 Toxicity**  
**Acute Toxicity** : Poorly soluble mixture. May cause physical fouling of aquatic organisms. Expected to be practically non toxic: LL/EL/IL50 > 100 mg/l (to aquatic organisms) LL/EL50 expressed as the nominal amount of product required to prepare aqueous test extract.
- 12.2 Persistence and degradability** : Expected to be not readily biodegradable. Major constituents are expected to be inherently biodegradable, but the product contains components that may persist in the environment.
- 12.3 Bioaccumulative Potential** : Contains components with the potential to bioaccumulate.
- 12.4 Mobility in Soil** : Liquid under most environmental conditions. If it enters soil, it will adsorb to soil particles and will not be mobile. Floats on water.
- 12.5 Result of PBT and vPvB assesment** : This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.
- 12.6 Other Adverse Effects** : Product is a mixture of non-volatile components, which are not expected to be released to air in any significant quantities. Not expected to have ozone depletion potential, photochemical ozone creation potential or global warming potential.

---

### SECTION 13. DISPOSAL CONSIDERATIONS

#### 13.1 Waste Treatment Methods

- Material Disposal** : Recover or recycle if possible. It is the responsibility of the waste generator to determine the toxicity and physical properties of the material generated to determine the proper waste classification and disposal methods in compliance with

## Safety Data Sheet

- applicable regulations. Do not dispose into the environment, in drains or in water courses.
- Container Disposal** : Dispose in accordance with prevailing regulations, preferably to a recognised collector or contractor. The competence of the collector or contractor should be established beforehand.
- Local Legislation** : Disposal should be in accordance with applicable regional, national, and local laws and regulations.  
EU Waste Disposal Code (EWC): 13 02 06 synthetic engine, gear and lubricating oils. Classification of waste is always the responsibility of the end user.

---

### SECTION 14. TRANSPORT INFORMATION

#### Land transport (ADR/RID):

##### ADR

This product is not classified as dangerous for this mode of transport. Therefore 14.1 UN Number, 14.2 UN Proper Shipping name, 14.3 Transport hazard class(es), 14.4 Packing group, 14.5 Environmental hazards, 14.6 Special precautions for user do not apply.

##### RID

This product is not classified as dangerous for this mode of transport. Therefore 14.1 UN Number, 14.2 UN Proper Shipping name, 14.3 Transport hazard class(es), 14.4 Packing group, 14.5 Environmental hazards, 14.6 Special precautions for user do not apply.

#### Inland waterways transport (ADN):

This product is not classified as dangerous for this mode of transport. Therefore 14.1 UN Number, 14.2 UN Proper Shipping name, 14.3 Transport hazard class(es), 14.4 Packing group, 14.5 Environmental hazards, 14.6 Special precautions for user do not apply.

#### Sea transport (IMDG Code):

This product is not classified as dangerous for this mode of transport. Therefore 14.1 UN Number, 14.2 UN Proper Shipping name, 14.3 Transport hazard class(es), 14.4 Packing group, 14.5 Environmental hazards, 14.6 Special precautions for user do not apply.

#### Air transport (IATA):

This product is not classified as dangerous for this mode of transport. Therefore 14.1 UN Number, 14.2 UN Proper Shipping name, 14.3 Transport hazard class(es), 14.4 Packing group, 14.5 Environmental hazards, 14.6 Special precautions for user do not apply.

#### 14.7 Transport in bulk according to Annex II of MARPOL 73/78 and the IBC Code

- Pollution Category : Not applicable.  
Ship Type : Not applicable.  
Product Name : Not applicable.  
Special Precaution : Not applicable.

## Safety Data Sheet

**Additional Information** : MARPOL Annex 1 rules apply for bulk shipments by sea.

---

### SECTION 15. REGULATORY INFORMATION

The regulatory information is not intended to be comprehensive. Other regulations may apply to this material.

#### 15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture

##### Other regulatory Information

**Authorisations and/or restrictions on use** : Product is not subject to Authorisation under REACH.

**Recommended Restrictions on Use (Advice Against)** : This product must not be used in applications other than those recommended in Section 1, without first seeking the advice of the supplier.

##### Chemical Inventory Status

**EINECS** : All components listed or polymer exempt.

**TSCA** : All components listed.

**Other Information** : Environmental Protection Act 1990 (as amended).  
Health and Safety at Work etc. Act 1974.  
Consumers Protection Act 1987.  
Pollution Prevention and Control Act 1999.  
Environment Act 1995.  
Factories Act 1961.  
The Carriage of Dangerous Goods and Use of Transportable Pressure Equipment (Amendment) Regulations 2011.  
Chemicals (Hazard Information and Packaging for Supply) Regulations 2009.  
Control of Substances Hazardous to Health Regulations 2002 (as amended).  
Merchant Shipping (Dangerous Goods and Marine Pollutants) Regulations 1997.  
Reporting of Injuries, Diseases and Dangerous Occurrences Regulations 1995 (as amended).

**Safety Data Sheet**

Personal Protective Equipment Regulations 2002.  
 Personal Protective Equipment at Work Regulations 1992.  
 Hazardous Waste (England and Wales) Regulations 2005(as amended).  
 Control of Major Accident Hazards Regulations 1999 (as amended).  
 Renewable Transport Fuel Obligations Order 2007 (as amended).  
 Energy Act 2011.  
 Environmental Permitting (England and Wales) Regulations 2010 (as amended).  
 Waste (England and Wales) Regulations 2011 (as amended).  
 Planning (Hazardous Substances) Act 1990 and associated regulations.  
 The Environmental Protection (Controls on Ozone-Depleting Substances) Regulations 2011.

**15.2 Chemical Safety Assessment** : No Chemical Safety Assessment has been carried out for this substance/mixture by the supplier.

**SECTION 16. OTHER INFORMATION****R-phrases(s)**

Not classified.  
 R38 Irritating to skin.  
 R41 Risk of serious damage to eyes.  
 R51/53 Toxic to aquatic organisms, may cause long-term adverse effects in the aquatic environment.  
 R52/53 Harmful to aquatic organisms, may cause long-term adverse effects in the aquatic environment.

**CLP Hazard Statements**

H304 May be fatal if swallowed and enters airways.  
 H315 Causes skin irritation.  
 H318 Causes serious eye damage.  
 H411 Toxic to aquatic life with long lasting effects.  
 H412 Harmful to aquatic life with long lasting effects.

**Additional Information** : No Exposure Scenario annex is attached to this safety data sheet. It is a non-classified mixture containing hazardous substances as detailed in Section 3; relevant information from Exposure Scenarios for the hazardous substances contained

## Safety Data Sheet

### Other Information

have been integrated into the core sections 1-16 of this SDS.

### Abbreviations and Acronyms

: Acute Tox. = Acute toxicity  
Asp. Tox. = Aspiration hazard  
Aquatic Acute = Acute hazards to the aquatic environment  
Aquatic Chronic = Hazardous to the aquatic environment - Long-term Hazard  
Eye Dam. = Serious eye damage/eye irritation  
Flam. Liq. = Flammable liquids  
Skin Corr. = Skin corrosion/irritation  
Skin Sens. = Skin sensitizer  
STOT SE = Specific target organ toxicity - single exposure  
STOT RE = Specific target organ toxicity - repeated exposure

The standard abbreviations and acronyms used in this document can be looked up in reference literature (e.g. scientific dictionaries) and/or websites.

ACGIH = American Conference of Governmental Industrial Hygienists  
ADR = European Agreement concerning the International Carriage of Dangerous Goods by Road  
AICS = Australian Inventory of Chemical Substances  
ASTM = American Society for Testing and Materials  
BEL = Biological exposure limits  
BTEX = Benzene, Toluene, Ethylbenzene, Xylenes  
CAS = Chemical Abstracts Service  
CEFIC = European Chemical Industry Council  
CLP = Classification Packaging and Labelling  
COC = Cleveland Open-Cup  
DIN = Deutsches Institut für Normung  
DMEL = Derived Minimal Effect Level  
DNEL = Derived No Effect Level  
DSL = Canada Domestic Substance List  
EC = European Commission  
EC50 = Effective Concentration fifty  
ECETOC = European Center on Ecotoxicology and Toxicology Of Chemicals  
ECHA = European Chemicals Agency
