Version 2.3

Revision Date 29.01.2016

Print Date 30.01.2016

SECTION 1: Identification of the substance/mixture and of the company/undertaking

1.1 Product identifier

Trade name	:	Shell Spirax S6 GXME 75W-80
Product code	:	001D8272

1.2 Relevant identified uses of the substance or mixture and uses advised against

Use of the Substance/Mixture	Transmission oil.
Uses advised against	This product must not be used in applications other than those listed in Section 1 without first seeking the advice of the supplier.

1.3 Details of the supplier of the safety data sheet

Manufacturer/Supplier	 Shell UK Oil Products Limited Shell Centre London SE1 7NA United Kingdom
Telephone Telefax Email Contact for Safety Data Sheet	 (+44) 08007318888 If you have any enquiries about the content of this SDS please email lubricantSDS@shell.com

1.4 Emergency telephone number

: +44-(0) 151-350-4595

SECTION 2: Hazards identification

2.1 Classification of the substance or mixture

Classification (REGULATION (EC) No 1272/2008)

Not a hazardous substance or mixture.

2.2 Label elements

Labelling (REGULATION (EC) No 1272/2008)

Hazard pictograms	:	No Hazard Symbol	required
Signal word	:	No signal word	
Hazard statements	:		PHYSICAL HAZARDS: Not classified as a physical hazard

Version 2.3	Revision Date 2	9.01.2016	Print Date 30.01.2016
		according to CLP criteria HEALTH HAZARDS: Not classified as a health criteria. ENVIRONMENTAL HAZ Not classified as environi according to CLP criteria	hazard under CLP ARDS: mental hazard
Precautionary statements :	Prevention: Response: Storage: Disposal:	No precautionary phrase No precautionary phrase No precautionary phrase No precautionary phrase	s. s.
Sensitising components	: Contains amine May produce an	phosphate. allergic reaction.	

2.3 Other hazards

This mixture does not contain any REACH registered substances that are assessed to be a PBT or a vPvB.

Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

Used oil may contain harmful impurities.

Not classified as flammable but will burn.

SECTION 3: Composition/information on ingredients

3.2 Mixtures

Chemical nature : Synthetic base oil and additives. Highly refined mineral oil. The highly refined mineral oil contains <3% (w/w) DMSOextract, according to IP346. The highly refined mineral oil is only present as additive diluent.

Hazardous components

Chemical name	CAS-No. EC-No.	Classification (REGULATION	Concentration [%]
	Registration number	(EC) No 1272/2008)	
Amine phosphate	91745-46-9 294-716-2	Acute Tox.4; H302 Skin Sens.1; H317 Eye Dam.1; H318 Aquatic Chronic2; H411	1 - 2.4

SAFETY DATA SHEET Regulation 1907/2006/EC Shell Spirax S6 GXME 75W-80

Version 2.3	Revision Date	Revision Date 29.01.2016	
Alkaryl amine	36878-20-3 Aquat 253-249-4 / 01- H413 2119488911-28	ic Chronic4; 1 - 3	
For explanation of abl	previations see section 16.		
SECTION 4: First aid m			
4.1 Description of first ai	d measures		
General advice	: Not expected to conditions.	be a health hazard when	n used under normal
Protection of first-aide	ders : When administering first aid, ensure that you are wearing the appropriate personal protective equipment according to the incident, injury and surroundings.		
If inhaled		ecessary under normal co rsist, obtain medical advie	
In case of skin contac	water and follow	ninated clothing. Flush ex v by washing with soap if ation occurs, obtain medi	available.
In case of eye contact		copious quantities of wate ation occurs, obtain medi	

If swallowed	 In general no treatment is necessary unless large quantities are swallowed, however, get medical advice.

4.2 Most important symptoms and effects, both acute and delayed

Symptoms	: Oil acne/folliculitis signs and symptoms may include formation
	of black pustules and spots on the skin of exposed areas.
	Ingestion may result in nausea, vomiting and/or diarrhoea.

4.3 Indication of any immediate medical attention and special treatment needed

Treatment : Notes to doctor/physician: Treat symptomatically.

SECTION 5: Firefighting measures

5.1 Extinguishing media

Suitable extinguishing media	: Foam, water spray or fog. Dry chemical powder, carbon dioxide, sand or earth may be used for small fires only.	
Unsuitable extinguishing media	: Do not use water in a jet.	
Special hazards arising from the substance or mixture		

5.2 Special hazards arising from the substance or mixture

Version 2.3	Revision Date 29.01.2016	Print Date 30.01.2016
Specific hazards during firefighting	: Hazardous combustion products ma mixture of airborne solid and liquid p (smoke). Carbon monoxide may be combustion occurs. Unidentified orga compounds.	articulates and gases evolved if incomplete
5.3 Advice for firefighters		
Special protective equipment for firefighters	: Proper protective equipment includir gloves are to be worn; chemical resis large contact with spilled product is e Breathing Apparatus must be worn v a confined space. Select fire fighter's	stant suit is indicated if expected. Self-Contained when approaching a fire in s clothing approved to
Specific extinguishing methods	 relevant Standards (e.g. Europe: EN Use extinguishing measures that are circumstances and the surrounding end 	appropriate to local

SECTION 6: Accidental release measures

6.1 Personal precautions, protective equipment and emergency procedures

Personal precautions	: 6.1.1 For non emergency personnel:
	Avoid contact with skin and eyes.
	6.1.2 For emergency responders:
	Avoid contact with skin and eyes.

6.2 Environmental precautions

con ditc	appropriate containment to avoid environmental amination. Prevent from spreading or entering drains, nes or rivers by using sand, earth, or other appropriate iers.
-------------	--

Local authorities should be advised if significant spillages cannot be contained.

6.3 Methods and materials for containment and cleaning up

Methods for cleaning up	 Slippery when spilt. Avoid accidents, clean up immediately. Prevent from spreading by making a barrier with sand, earth or other containment material. Reclaim liquid directly or in an absorbent. Soak up residue with an absorbent such as clay, sand or other suitable material and dispose of properly.
-------------------------	---

6.4 Reference to other sections

For guidance on selection of personal protective equipment see Chapter 8 of this Safety Data Sheet., For guidance on disposal of spilled material see Chapter 13 of this Safety Data Sheet.

Version 2.3

Revision Date 29.01.2016

SECTION 7: Handling and storage					
General Precautions	 Use local exhaust ventilation if there is risk of inhalation of vapours, mists or aerosols. Use the information in this data sheet as input to a risk assessment of local circumstances to help determine appropriate controls for safe handling, storage and disposal of this material. 				
7.1 Precautions for safe handling					
Advice on safe handling	 Avoid prolonged or repeated contact with skin. Avoid inhaling vapour and/or mists. When handling product in drums, safety footwear should be worn and proper handling equipment should be used. Properly dispose of any contaminated rags or cleaning materials in order to prevent fires. 				
Product Transfer	 This material has the potential to be a static accumulator. Proper grounding and bonding procedures should be used during all bulk transfer operations. 				
7.2 Conditions for safe storage, inc	cluding any incompatibilities				
Other data	: Keep container tightly closed and in a cool, well-ventilated place. Use properly labeled and closable containers.				
	Store at ambient temperature.				
	Refer to section 15 for any additional specific legislation covering the packaging and storage of this product.				
	The storage of this product may be subject to the Control of Pollution (Oil Storage) (England) Regulations. Further guidance may be obtained from the local environmental agency office.				
Packaging material	 Suitable material: For containers or container linings, use mild steel or high density polyethylene. Unsuitable material: PVC. 				
Container Advice	: Polyethylene containers should not be exposed to high temperatures because of possible risk of distortion.				
7.3 Specific end use(s)					
Specific use(s)	: Not applicable.				

Version 2.3

Revision Date 29.01.2016

Print Date 30.01.2016

SECTION 8: Exposure controls/personal protection

8.1 Control parameters

Occupational Exposure Limits

Components	CAS-No.	Value type (Form of exposure)	Control parameters	Basis
Oil mist, mineral		TWA	5 mg/m3	US. ACGIH Threshold Limit Values

Biological occupational exposure limits

No biological limit allocated.

Monitoring Methods

Monitoring of the concentration of substances in the breathing zone of workers or in the general workplace may be required to confirm compliance with an OEL and adequacy of exposure controls. For some substances biological monitoring may also be appropriate.

Validated exposure measurement methods should be applied by a competent person and samples analysed by an accredited laboratory.

Examples of sources of recommended exposure measurement methods are given below or contact the supplier. Further national methods may be available.

National Institute of Occupational Safety and Health (NIOSH), USA: Manual of Analytical Methods http://www.cdc.gov/niosh/

Occupational Safety and Health Administration (OSHA), USA: Sampling and Analytical Methods http://www.osha.gov/

Health and Safety Executive (HSE), UK: Methods for the Determination of Hazardous Substances http://www.hse.gov.uk/

Institut für Arbeitsschutz Deutschen Gesetzlichen Unfallversicherung (IFA), Germany http://www.dguv.de/inhalt/index.jsp

L'Institut National de Recherche et de Securité, (INRS), France http://www.inrs.fr/accueil

8.2 Exposure controls

Engineering measuresThe level of protection and types of controls necessary will vary depending upon potential exposure conditions. Select controls based on a risk assessment of local circumstances. Appropriate measures include: Adequate ventilation to control airborne concentrations.

Where material is heated, sprayed or mist formed, there is greater potential for airborne concentrations to be generated.

General Information:

Define procedures for safe handling and maintenance of controls.

Educate and train workers in the hazards and control measures relevant to normal activities associated with this product.

Ensure appropriate selection, testing and maintenance of equipment used to control exposure, e.g. personal protective equipment, local exhaust ventilation.

Drain down system prior to equipment break-in or maintenance.

Version 2.3

Revision Date 29.01.2016

Print Date 30.01.2016

Retain drain downs in sealed storage pending disposal or subsequent recycle. Always observe good personal hygiene measures, such as washing hands after handling the material and before eating, drinking, and/or smoking. Routinely wash work clothing and protective equipment to remove contaminants. Discard contaminated clothing and footwear that cannot be cleaned. Practice good housekeeping.

Personal protective equipment

The provided information is made in consideration of the PPE directive (Council Directive 89/686/EEC) and the CEN European Committee for Standardisation (CEN) standards.

Personal protective equipment (PPE) should meet recommended national standards. Check with PPE suppliers.

Eye protection	If material is handled such that it could be splashed into eyes, protective eyewear is recommended. Approved to EU Standard EN166.
Hand protection	
Remarks	Where hand contact with the product may occur the use of gloves approved to relevant standards (e.g. Europe: EN374, US: F739) made from the following materials may provide suitable chemical protection. PVC, neoprene or nitrile rubber gloves Suitability and durability of a glove is dependent on usage, e.g. frequency and duration of contact, chemical resistance of glove material, dexterity. Always seek advice from glove suppliers. Contaminated gloves should be replaced. Personal hygiene is a key element of effective hand care. Gloves must only be worn on clean hands. After using gloves, hands should be washed and dried thoroughly. Application of a non-perfumed moisturizer is recommended.
	For continuous contact we recommend gloves with breakthrough time of more than 240 minutes with preference for > 480 minutes where suitable gloves can be identified. For short-term/splash protection we recommend the same, but recognize that suitable gloves offering this level of protection may not be available and in this case a lower breakthrough time maybe acceptable so long as appropriate maintenance and replacement regimes are followed. Glove thickness is not a good predictor of glove resistance to a chemical as it is dependent on the exact composition of the glove material. Glove thickness should be typically greater than 0.35 mm depending on the glove make and model.
Skin and body protection	Skin protection is not ordinarily required beyond standard work clothes. It is good practice to wear chemical resistant gloves.
Respiratory protection	No respiratory protection is ordinarily required under normal

Conductivity Decomposition temperature	 This material is not expected to be a Data not available 	a static accumulator.		

SECTION 10: Stability and reactivity

10.1 Reactivity

The product does not pose any further reactivity hazards in addition to those listed in the following sub-paragraph.

10.2 Chemical stability

Stable.

No hazardous reaction is expected when handled and stored according to provisions

10.3 Possibility of hazardous reactions

Hazardous reactions	:	Reacts with strong oxidising agents.
10.4 Conditions to avoid Conditions to avoid	:	Extremes of temperature and direct sunlight.
10.5 Incompatible materials Materials to avoid	:	Strong oxidising agents.
10.6 Hazardous decomposition products		
Hazardous decomposition products	:	Hazardous decomposition products are not expected to form during normal storage.

SECTION 11: Toxicological information

11.1 Information on toxicological effects

	Basis for assessment	:	Information given is based on data on the components and the toxicology of similar products.Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).
	Information on likely routes of exposure	:	Skin and eye contact are the primary routes of exposure although exposure may occur following accidental ingestion.
Ас	ute toxicity <u>Product:</u>		
	Acute oral toxicity	:	LD50 rat: > 5,000 mg/kg Remarks: Expected to be of low toxicity:

Version 2.3	Revision Date 29.01.2016	Print Date 30.01.2016
Acute inhalation toxicity	: Remarks: Not considered to be an ir normal conditions of use.	halation hazard under
Acute dermal toxicity	: LD50 Rabbit: > 5,000 mg/kg Remarks: Expected to be of low toxi	city:

Skin corrosion/irritation

Product:

Remarks: Expected to be slightly irritating., Prolonged or repeated skin contact without proper cleaning can clog the pores of the skin resulting in disorders such as oil acne/folliculitis.

Serious eye damage/eye irritation

Product:

Remarks: Expected to be slightly irritating.

Components:

Amine phosphate:

Remarks: Based on available data, the classification criteria are not met.

Respiratory or skin sensitisation

Product:

Remarks: For respiratory and skin sensitisation:, Not expected to be a sensitiser.

Components:

Amine phosphate:

Remarks: Experimental data has shown that the concentration of potentially sensitising components present in this product does not induce skin sensitisation., May cause an allergic skin reaction in sensitive individuals.

Germ cell mutagenicity

Product:

: Remarks: Not considered a mutagenic hazard.

Carcinogenicity

Product:

Remarks: Not expected to be carcinogenic.

Material	GHS/CLP Carcinogenicity Classification
Highly refined mineral oil	No carcinogenicity classification.

Version 2.3

Revision Date 29.01.2016

Print Date 30.01.2016

Reproductive toxicity

Product:

Remarks: Not expected to impair fertility., Not expected to be a developmental toxicant.

STOT - single exposure

Product:

Remarks: Not expected to be a hazard.

STOT - repeated exposure

Product:

Remarks: Not expected to be a hazard.

Aspiration toxicity

Product:

Not considered an aspiration hazard.

Further information

Product:

Remarks: Used oils may contain harmful impurities that have accumulated during use. The concentration of such impurities will depend on use and they may present risks to health and the environment on disposal., ALL used oil should be handled with caution and skin contact avoided as far as possible.

Remarks: Slightly irritating to respiratory system.

Remarks: Classifications by other authorities under varying regulatory frameworks may exist.

Summary on evaluation of th Germ cell mutagenicity- Assessment	 CMR properties This product does not meet the criteria for classification in categories 1A/1B. 	
Carcinogenicity - Assessment	: This product does not meet the criteria for classification in categories 1A/1B.	
Reproductive toxicity - Assessment	: This product does not meet the criteria for classification in categories 1A/1B.

SECTION 12: Ecological information

12.1 Toxicity

Basis for assessment	:	Ecotoxicological data have not been determined specifically for this product. Information given is based on a knowledge of the components and the ecotoxicology of similar products. Unless indicated otherwise, the data presented is representative of the product as a whole, rather than for individual component(s).(LL/EL/IL50 expressed as the nominal amount of product required to prepare aqueous test extract).
		Domarka: Exported to be practically par taxis:
Toxicity to fish (Acute toxicity)	•	Remarks: Expected to be practically non toxic: LL/EL/IL50 > 100 mg/l
Toxicity to crustacean (Acute	:	Remarks: Expected to be practically non toxic:
toxicity)		LL/EL/IL50 > 100 mg/l
Toxicity to algae/aquatic		Remarks: Expected to be practically non toxic:
plants (Acute toxicity)	•	LL/EL/IL50 > 100 mg/l
Toxicity to fish (Chronic	:	Remarks: Data not available
toxicity)		
Toxicity to crustacean (Chronic toxicity)	:	Remarks: Data not available
Toxicity to microorganisms	:	
(Acute toxicity)		Remarks: Data not available

12.2 Persistence and degradability

Product:	
Biodegradability	: Remarks: Expected to be not readily biodegradable., Major constituents are expected to be inherently biodegradable, but contains components that may persist in the environment.
12.3 Bioaccumulative potential	
Product:	
Bioaccumulation	: Remarks: Contains components with the potential to bioaccumulate.
Partition coefficient: n-	: Pow: > 6Remarks: (based on information on similar products)

octanol/water		
12.4 Mobility in soil		
Product:		
Mobility	 Remarks: Liquid under most environ enters soil, it will adsorb to soil partio mobile. Remarks: Floats on water. 	
12.5 Results of PBT and vPv	/B assessment	
Product:		
Assessment	: This mixture does not contain any R substances that are assessed to be	
12.6 Other adverse effects		
Product:		
Additional ecological information	 Product is a mixture of non-volatile of expected to be released to air in any Not expected to have ozone depletion photochemical ozone creation potent potential. Poorly soluble mixture., May cause porganisms. 	y significant quantities., on potential, ntial or global warming

SECTION 13: Disposal considerations

13.1	Waste treatment methods		
Product		:	Waste product should not be allowed to contaminate soil or ground water, or be disposed of into the environment. Waste, spills or used product is dangerous waste.
			Disposal should be in accordance with applicable regional, national, and local laws and regulations. Local regulations may be more stringent than regional or national requirements and must be complied with.
	Contaminated packaging	:	Dispose in accordance with prevailing regulations, preferably to a recognized collector or contractor. The competence of the collector or contractor should be established beforehand. Disposal should be in accordance with applicable regional, national, and local laws and regulations.
	Local legislation Waste catalogue	:	EU Waste Disposal Code (EWC):
	Waste Code	:	13 02 06*

Version 2.3	Revision Date 29.01.2016	Print Date 30.01.2016			
Remarks	: Classification of waste is always the user.	responsibility of the end			

SECTION 14: Transport information

14.1 UN number	
ADR	: Not regulated as a dangerous good
RID	: Not regulated as a dangerous good
IMDG	: Not regulated as a dangerous good
ΙΑΤΑ	: Not regulated as a dangerous good
14.2 Proper shipping name	
ADR	: Not regulated as a dangerous good
RID	: Not regulated as a dangerous good
IMDG	: Not regulated as a dangerous good
IATA	: Not regulated as a dangerous good
14.3 Transport hazard class	
ADR	: Not regulated as a dangerous good
RID	: Not regulated as a dangerous good
IMDG	: Not regulated as a dangerous good
ΙΑΤΑ	: Not regulated as a dangerous good
14.4 Packing group	
ADR	: Not regulated as a dangerous good
RID	: Not regulated as a dangerous good
IMDG	: Not regulated as a dangerous good
ΙΑΤΑ	: Not regulated as a dangerous good
14.5 Environmental hazards	
ADR	: Not regulated as a dangerous good
RID	: Not regulated as a dangerous good
IMDG	: Not regulated as a dangerous good
14.6 Special precautions for user	
Remarks	: Special Precautions: Refer to Chapter 7, Handling & Storage, for special precautions which a user needs to be aware of or needs to comply with in connection with transport.
14.7 Transport in bulk according t	o Annex II of MARPOL 73/78 and the IBC Code
Pollution category	: Not applicable
	: Not applicable
	: Not applicable
Special precautions	: Not applicable
Additional Information	: MARPOL Annex 1 rules apply for bulk shipments by sea.

SECTION 15: Regulatory information

15.1 Safety, health and environmental regulations/legislation specific for the substance or mixture
